## This Week's Accidents

August Schnell was working in a gin above Lexington and in attempting to replace a belt on a wheel in motiom his arm was caught and in some way one bone in the forearm was broken quite badly. He does not know just how his arm was caught or how he freed himself from the dangerous situation. He was rushed to Giddings and given prompt medical attention and is doing well, but it is feared that it will be quite a while before he regains the use of his arm.

Jim Killough and Herbert Daniels were driving Jim's auto on the La Grange road several miles from town when the steering gear gave away while the car was in motion. The car swung to one side of the road and turned about half way over, throwing Jim to the ground and dragging him until he struck a culvert. He received several injuries, among them being three ribs broken. Herbert received a cut on the chin.

Billie Brown happened to the accident of a 300 lb. block of ice falling on his foot, bruising it; but not breaking any bones. He is able to walk on it.

J. E. Sommer was cutting weeds and a telephone wire was low and it caused his hoe to hit him in the face, cutting an ugly gash in his nose. He says it takes more than that to stop him.
