Improved Cotton Seed

August Baack of the Concord community was in Friday paying for some advertising placed in the News for his cotton seed. He is well pleased with the results and finds ready sale for his improved seed, as soon as he lets the public know that he has them for sale. Mr. Baack has been giving special attention the past two years to improving his cotton seed, and he has received from 38 to 40 per cent output.

Last year he produced one third of a bale to the acre on upland; he had 42 acres planted to cotton, and gathered 14 bales, all of which was produced on post oak land and not in the bottom. He will continue to improve his cotton seed from year to year, and it shows that Lee County is also productive of high grade products, when a person gives attention to the conditions.
