

## **Emmrich Mill Has Served Farmers Of Area Since 1919**

Emmrich Mill, engaged in feed grinding and mixing business, has served the needs of Lee County farmers since 1919.

Although the grinding of feed in their big hammermill, and custom mixing of feed for customers, including the mixing of feed with molasses still is their leading service to the community, they also produce one other product that brings customers from long distances.

One hammermill, which grinds grain very fine, is reserved exclusively for the manufacture of cornmeal. It produces a product unmatched by any other cornmeal, according to many faithful cus-

tomers.

The mill is kept so busy with its custom grinding of feed and cornmeal, and custom mix-

ing of feed, that no attempt has been made at the commercial production of feeds or cornmeal.
