October 24, 1924

Many Out of Work

Mrs. Emma Fischer of Port Arthur was n Saturday renewing for the News. She formerly lived in Giddings and comes back occasionally to visit the home town. She says that many people are out of work where she is living and they are out of employment for months. They are in hopes that after the election, they will be returned to work.

People in general know very little of the unemployment this year. In the East and along the Atlantic seaboard there are thousands of people out of work, but not much noise is being made of it because this is election year. for the Republican Party has always maintained that there were no empty dinner buckets or men out of work when the Republicans were running the government. A visit to the industrial centers will explode that idea during 1924.
