**Former Lee County Boy Honored**

Herbert Friedrich, a former Lee County boy but the family moved to Smithville a few years ago where he graduated from high school and entered the State University, was distinctly honored last week when the Westinghouse Electrical Company chose Herbert as being good material from among the graduates in electrical engineering of five leading universities of the country. He will soon enter their employment at Pittsburg, Pa. where he will be given the opportunity to go as high as his capabilities will permit. Quite an honor to be selected from a large class at the University and also by such a large employing firm.
