

Lee County Motor Company

One of the outstanding concerns of Giddings and Lee County, is the Lee County Motor Company, the authorized Ford dealers for this trade territory, selling Ford Cars, Trucks, and the widely used Fordson Tractors and Lincoln Cars.

They occupy a large and ornate building, located on the corner of two well traversed streets. The building contains all the equipment that has been developed for use in a complete station. All the machinery used in their shop is made especially for the repairing of Ford Cars, Trucks, and Fordson Tractors.

All mechanics employed are expert Ford repair men. All repair work is done on the flat rate charge—in other words, the Ford Motor Company of Detroit furnishes them with a list price of the labor charges and requires them to follow the list. You will find the price much lower and you will know just what a repair job will cost before they start to work.

The public is invited to inspect this plant at any time. The Lee County Motor Company of Giddings has a number of used cars on hand and will be glad to demonstrate them to you. Every progressive farmer needs a Fordson Tractor. It does the work of six horses, does it better and cheaper. The Lee County Motor Company uses none but genuine Ford parts in all their repair work. They have a full line of accessories and especially recommend Fisk Red-Top and Goodyear casings to the trade.
