**MITCHELL'S GARDEN**

The latest addition to Giddings' eating establishments is Mitchell's garden which presents a pretty sight at night when it has numerous electric lights burning under the trees. Tables have been provided outside where anything from a chicken dinner to hamburgers can be served. It is located in East Giddings on the highway and has been keeping open all night. The patronage is reported fair, considering the slowness of times at present, but plans are being made for increased patronage.
