Schneiders Get Modern Equipment

Schneider Oldsmobile Co. is installing a new Stewart-Warner Electronic Wheel Balancer. Mr. Rubin Schneider states that this is the only one kind in this part of the country.

The new machine enables them to balance the wheels right on cars and trucks while you wait.

Details of this modern equipment will be found in their large ad. There will be a factory man here Saturday March 14, to point out the fine new features of this machine and friends and customers are invited to see the demonstration.
