

**The Giddings News**

March 20, 1931

**BLUE NEWS**

Blue, March 16. — How is everybody enjoying this spring weather? We were visited Saturday night and Sunday by a fine shower, and a cool norther.

Crop reports from this section are as follows:

The farmers have been very busy up until present weather conditions, planting corn and other grain. Some are reporting corn sprouting and coming up. The farmers' wives are very busy in their gardens, smiling and hoping for a prosperous gift from the garden of 1931. Cabbage, onions, tomatoes and other vegetables are looking fine. Irish potatoes that were planted some time ago are coming up. The tomato outlook is very good. The farmers intend setting them out, as the weather gets still warmer. We are hoping that this crop pays the farmer a good price, as he needs it to compare with other losses that he has been taking during the past years.

**School Notes.**

The state inspector, and our County Superintendent visited our school Thursday. Our school is progressing fine, but reports are that it will only last three more weeks.

The school is preparing for the county meet which will be held at Giddings, March 27.

**Test Well News.**

The Polk-Stolz well people are very busy at present with their drilling under a double shift working day and night. They have very good indications and are now down about 1700 feet.

The Wheeler No. 1 is supposed to start work this week, as the field office was erected last week. He also has a double working shift.
