**BLUE NEWS**

Glad to report a good rain in this part of the country Sunday morning. It will be of great help to corn and especially good to tomato growers. We are glad to report that tomatoes are looking fine. We hope for a successful tomato year, and also for prices to be rather high at the beginning of the season. Watermelons have been planted and are coming up. Many people are trying this crop also, and are planting early on account of high prices prevailing early in the season.

The play at Blue Saturday night was well attended by many people. We are hoping for a large crowd to be present at our school graduating exercises Friday night. Everybody cordially invited to be present.

The Blue School closed April 22. We are glad to report a good school, under management of Misses Mattie Everett, Margie Scarbrough and Alpha Bryant.

There are now at present three wells going down; the Burt Well on Mrs. A. E. Sanders place, Wheeler No. 1; and Polk No. 2. The Polk well reported Sunday loosing more tools in their well, delaying them awhile longer. They report a good showing. Oil men were buying leases and royalty last week.
