**BLUE NEWS**

The people of Blue are going around with smiles on their faces. All are proud of crops as they look so promising at present. Blue was visited last Thursday and Friday with two downpours of rain amounting to about 2 inches. Corn of early planting will be very short but corn of late planting will be helped from the rains.

Farmers say cotton is doing better than it has done since 1926 when there was a bumper crop made. Cotton bolls are seen in large quantities at present.

The sweet potato crop is somewhat late this season but last Thursday and Friday people were busy setting them out after the big rain.

Many farmers are planning on planting late feed crops such as maize, higer, and corn, as this will be of benefit to them later on.

We are at present living in prosperity; let's appreciate it if hard times do knock at our door.

The Methodist Revival Meeting closed Thursday night of last week, and was well attended and I'm sure people liked the cooperative help of our pastor.
