The Dime Box girls went to Giddings last Friday afternoon for the purpose of bringing home their annual victory in basket ball. No one from Dime Box expected anything but a victory for us, but those who were not there can't understand how Giddings managed to get 15 points while our girls made only 37.

They say, in Giddings, that we have "awfully" large girls, but very strange is the fact that this is always so much more noticeable after their last ray of hope is gone. We should like for them to play a Burleson county team or some other place where they really do have large girls.

We do realize that our girls are some larger than the Giddings girls, and we are just as proud of the fact that we can grow better corn and cotton in Dime Box than they can in Giddings.

We are proud too, that altho they do sometimes lose, the Dime Box girls are big enough, even then, to be courteous.
