FEDOR 4-H CLUB

The Fedor 4-H Club girls met at 7:30 p. m. Jan. 27 at the Fedor Parochial School. The meeting was turned over to Miss Elliott who gave us important points in the poultry work. February and March are the two best months to buy your chicks, because the market has a better price when it comes to selling them. The Black and White Jersey breed is selected for meat, also various others. The White and Brown Leghorns are some that are selected for eggs. Now there are hens which are used for "dual purposes," some of those are: Rhode Island Reds, Rhode Island Whites, and Silver Laced Wyandottés. In setting a hen one should have a roomy, cool and well ventilated nest. Keep it clean and be on the lookout for any insects. The usual number is 15 eggs per nest.

The following members were present: Ruth Michalk, Lorine Becker, Caroline Jatzlau, Frances Jatzlau, and Dorothy Michalk.
