

LEE COUNTY RANKS HIGH IN POULTRY PRODUCTS

Lee County shows the largest poultry increase of any county in Texas. During the past three years the gain has been over three hundred percent, and last year Giddings dressed more poultry, including turkeys, than any point in the state.

Lee County has also become the White Rock center of Texas. The nucleus for the White Rock experimentation flock at A. & M. was obtained from Lee Co.

The poultry products produced annually in Lee County yield a substantial portion of the county's agricultural revenue.

Last year our largest plant alone shipped one hundred cars of canned eggs (2,000,000 lbs.); 94 cars of dressed turkeys (1,800,000 lbs.); 1,250,000 lbs. of dressed chickens. For this produce \$920,000.00 was paid to the farmer. Twelve thousand bales of cotton at 15c per pound would not quite yield this sum.

The Lee County Fair Association wishes to encourage poultry production and requests producers to show at the Fair. Exhibit your choice birds and make the poultry show something to be talked about.

On account of an error in the Premium List for the Lee Co. Fair published last week, the corrected List for the Poultry Dept. is here given:

MARTIN PLACKE, Superintendent

Otto Aschenbeck, Carl Blumbaum,

Herman Meissner, R. H. Tempel, Committee.

Cash premiums in addition to ribbons will be awarded in each breed of chickens and turkeys, provided there are two or more entries competing for each premium.
