June 4, 1920

TANGLEWOOD NOTES.

Tanglewood Texas, June 8th.
We have had rain, and crops are looking fine.

The Underwriters Oil Co. is still waiting for a carload of casing that was ordered in February. It is now expected to arrive in a few days when work will recommence again on the well.

A representative of a Saint Louis Co. has been securing oil and gas leases west of town, and will have a geologist here in a few days to select a location for a test well.

If the geologist makes a favorable report, they will have a standard rig here inside of sixty days. We also learn that there will be something doing in oil up around Hicks.

Dr. C. C. Weaver of Houston will begin a protracted meeting in the Presbyterian church on June 15th, continuing to the 22nd. Dr. Weaver is Supt. of Home Missions for Brazos Presbytery.

The annual Cemetery working is set for June 23rd. Basket dinner on the ground. Everybody invited. Hoes will be provided for all candidates.

"Observer."
