WORK ON TEST WELL

The Shell Co. has begun drilling another test well for oil in the Tanglewood area. This well is down several hundred feet and some casing has been set. It is located a few hundred yards west of Shell No. 1 which was on the Brown land at Highway 77. Shell No. 1 was down over 5,000 ft. and struck a showing of oil, and leasing and trading in royalties were quite active for a short time.
