**HIGHWAY AT PAIGE
IS REROUTED**

Work has been begun on re-routing the highway through Paige. It will run along the railroad right-of-way through that place, and will do away with the four curves which the present highway has. Grading has been done, and it is understood that a topping will be put on soon. F. Eichler of Giddings has advantage of the new location and has let the contract for a filling station on the Erwin corner. The present building which is an old landmark, will be moved away, and the new filling station will face northwest.
